

# MCLEOD GAUGE WITH MERCURY

Mcleod Gauge with Mercury is the industry standard vacuum measuring gauge which uses a mercury column on a calibrated analog digital scale. Metallic base stand with rotating arrangement for fast & accurate measurement is provided as standard supply.

The Mcleod Gauge comes with a hose nipple connection at the back for connecting the measurement point to the gauge. The gauge is tilted (rotated) by 90° for measuring the vacuum readout. High purity mercury provided along with gives precise results. Finds extensive use in measuring vacuum at vacuum pumps, vacuum ejectors, vacuum systems, chemical & pharma industry for vacuum measurement at reactors, vacuum metallizing plants, oil filtration units & endless other uses.

## SPECIFICATIONS:

**Manufacturer** : ACE Instruments

**Model** : AI-MCG-1

**Standard measurement range** : 10 to 0.01 mm.Hg.

**Optionally available in the range** : 1 to 0.001 mm.Hg.

**Warranty** : No Warranty is provided since it is a glass based instrument & hence fragile
