

# Elitech WJL-6000S

## Freon Leak Detector

Elitech WJL-6000S Freon Leak Detector is a device that is designed to detect Refrigerant or freon gas leakages in Industries and other Applications. This Freon Leak Detector has high sensitivity with a good visualized alarm display. It adjusts sensitivity automatically and optimal detection status to locate leaks much more accurately. This leak detector has a built-in high-precision IC with an ultra-low power consumption circuit design which enables much more stable operation and endurable batteries.

**Applications:** Used in Industries and other Applications to detect the leakage of Refrigerant and freon gases.

# Features

- It has Upgraded 5 LED indicators
- This Elitech WJL-6000S Freon Leak Detector has a flexible probe of around •
- 7.8-inch which allows detections in difficult and hard-to-reach areas.
- This freon leak detector comes with 7 Adjustable Sensitivity
- Response within 3 seconds
- It has a low battery indicator and also an alarm.

Manufacturer Elitech

Model No WJL-6000S

Measuring Parameters All halogenated gases

Operating Temperature 0 Degree Celsius -52 Degree Celsius

Operation Mode Continuous, No Limitation

Power Source Battery

Sensitivity 0.21oz/yr for all hydrogenated refrigerants

Response Time Instantaneous

Display Analog

Battery Life Approximately 50 hr of Normal Use

Power Supply 6V DC, 4 A alkaline batteries

Probe Length 7.87inch

Temp | Humidity | Pressure | Differential Pressure | Vacuum | Gases | Particle | Air Flow  
Moisture | Dissolved Oxygen | Radiation | Air Quality | Light / Lux | Distance | Vibration
