# Food Storage Datalogger RC-17

Food Storage Datalogger is a compact and reliable temperature monitoring device designed to record temperature data over time. It offers precise measurements and a user-friendly interface, making it suitable for diverse applications in industries where temperature control is critical.

## Specifications

- Measuring temperature	-30°C to 70°C / -22°F to 158°F
- Recording Options	Single-Use
- Temp Accuracy	±0.5°C
- Temp Resolution	0.1 °C
- Data storage Capacity	Maximum 16,000 Points
- Connection interface	USB 2.0
- Battery	CR2450 Button Cell
- Logging Interval	10 Seconds to 24 Hours
- Certifications	EN12830, CE, RoHS
- Report Generation	Auto PDF report, PDF/EXCEL/TXT via ElitechLog Software
- Alarm	LED Indicators for quick screening
- Protection grade	IP67
- Dimensions	131mmx24mmx7mm(LxD)
- Weight	60g
